“Solid State NMR: a non-expert point of view”

As a long term NMR lab manager, I had to train over the years many students with a basic or even no knowledge of practical NMR spectroscopy. I have seen how difficult it may be for a non-expert to make an efficient day-to-day use of a Solid State NMR instrument (SSNMR). Starting from a basic knowledge of NMR spectroscopy, I will try to illustrate differences between liquid state and solid state NMR, discuss of some practical aspects of SSNMR and show examples of dynamics and structural information obtained by SSNMR.

Mittwoch, 11. Juli 2018, 11:00 Uhr
Hörsaal 4 der Fakultät für Chemie
Währinger Straße 42, 1090 Wien

Freddy Kleitz
Institut für Anorganische Chemie – Funktionelle Materialien

Veronika Somoza
Vizedekanin

Bernhard Keppler
Dekan

Lothar Brecker
