

Einladung zum Vortrag von

Dr. Christian Leinenbach
EMPA, Dübendorf, Schweiz

**„Phase transformations during rapid solidification of
alloys – Towards alloy desing for beam-based
additive manufacturing”**

Christian Leinenbach's research interests are the computer assisted development of metallic materials; experimental and computational phase diagram investigations; development and optimization of advanced methods for joining of dissimilar materials and the tailoring of interface reactions; mechanical performance and life-time predictions of bulk materials and material joints in extreme environments and the correlation with the materials' microstructures.

Freitag, 13.05.2016, 14:15 Uhr
Seminarraum 2
Währinger Straße 42, 1090 Wien

Wolfgang Kautek
Institut für Physikalische Chemie

Klaus Richter
Institut für Anorganische Chemie -
Funktionelle Materialien

Bernhard Keppler
Dekan

Lothar Brecker
Vizedekan

Veronika Somoza
Vizedekanin
