

The Institute of Biological Chemistry of the University of Vienna is looking for a talented technician with experience in Chemical Biology, Pharmacology and Molecular Biology to join the Neuropeptide Research Group led by A/Prof. Markus Muttenthaler. The group is focused on the exploration of nature's biodiversity to develop molecular probes and discover novel therapeutic leads with applications in pain, cancer, autism, gastrointestinal disorders and neurodegenerative diseases. The successful applicant will be involved in the pharmacological characterisation of molecular probes and therapeutic leads, management of cell cultures, recombinant peptide/protein expression and chemical peptide synthesis.

To see the full position listing including selection criteria, responsibilities and work place information, please go to <https://www.neuropeptidelab.com/opportunities> .

To apply for this position, please send your application package (cover letter, CV, statement addressing the individual selection criteria, contact details of two referees) to markus.muttenthaler@univie.ac.at with 'Application for Technician – Chemical Biology' in the subject line.
