

Einladung zum Vortrag von

Prof. Dr. Guy Lloyd-Jones

School of Chemistry, University of Edinburgh,
Scotland

**„Peeling the onion: lessons learned and
tools developed”**

The lecture will focus on the study of the mechanism of reactions of interest to the synthetic chemist. It will be based on data from our recent investigations into the stability, mode of action, preparation and in situ liberation of organosilane and organoboron reagents, and also introduce application of some new tools we that we have been developing for in situ reaction assembly and analysis. We shall show that overall it still remains easy to be fooled by mechanisms, even of what are apparently very simple processes.

Mittwoch, 22. November 2017, 16:15 Uhr
Hörsaal 3
Währinger Straße 38, 1090 Wien

Nuno Maulide
Institut für Organische Chemie
